

Entech Solar to Present Latest Products & Services at Solar Power International 2010

Fort Worth, TX – October 8, 2010 – Entech Solar (OTC BB: ENSL.OB) (the “Company”, “Entech”) today announced that the Company will be exhibiting at the 2010 Solar Power International Trade Show and Conference, October 12-14 in Los Angeles, CA. Entech plans to present its latest products and services, namely, the SolarVolt™ concentrating photovoltaic (CPV) module, its innovative tubular skylight and its Engineering Services, to the solar industry, including integrators, installers, utilities, investors, builders, architects, large energy users and policymakers.

SolarVolt's size and shape are similar to those of a standard flat-plate PV module, while concentrating sunlight 20x and generating reliable electricity at low cost. SolarVolt modules were submitted for independent certification testing on September 27, 2010, a key milestone in the product's commercialization plan for large commercial, industrial, government and utility applications. Entech's tubular skylight, with its patented Solar Collimator, brings more and better light to where it's needed for the same roof aperture than do other tubular skylights. The Engineering Services group provides its customers with a readily available expert team to create custom PV systems designs

Billed as America's largest solar event, the Solar Power International (SPI) conference was created through a partnership between the Solar Electric Power Association (SEPA) and the Solar Energy Industries Association (SEIA) in 2004. Founded as a business-to-business solar conference and expo, the SPI has established itself as the premiere solar event in the United States with over 25,000 attendees expected this year. Next year, SPI 2011 will be held in Dallas, TX, close to Entech's headquarters.

This year, the Entech Solar booth will be located at exhibit space #2901 in the LA Convention Center.

About Entech Solar

Entech Solar, Inc. is a leading developer of renewable energy technologies and sustainable daylighting solutions for the commercial, industrial and utility markets. Entech Solar designs concentrating solar modules that produce electricity from sunlight as part of the SolarVolt™ product line. The Company also manufactures and markets the Entech™ Tubular Skylight, a state-of-the-art tubular skylight that provides superior light output and optical efficiency for the commercial and industrial green building initiatives.
